

Rebecca Woody

Ph.D. Candidate, Astrophysics

Cambridge, MA | rebecca.woody@cfa.harvard.edu | rebeccawoody.github.io | [rebeccawoody](#)

Experience

Center for Astrophysics | Harvard & Smithsonian, Graduate Researcher

Cambridge, MA

- TODO: research group / advisor and a one-line description.

Jan 2020 – present

Education

PhD Harvard University, Astronomy & Astrophysics

Cambridge, MA

- Advisor: TODO

Jan 2020 – present

BS TODO Undergraduate Institution, Physics / Astronomy

TODO

- TODO: dates, honors (e.g. Magna Cum Laude), advisor.

Research Interests

Galactic archaeology; the formation and hierarchical assembly of the Milky Way halo; globular cluster systems; stellar ages and isochrone fitting; the age–metallicity relation; accreted dwarf galaxies and the Gaia–Sausage–Enceladus merger; low-mass stars and the mixing-length parameter.

Teaching and Leadership

- **TODO Institution** — Teaching Fellow (YEAR): led sections/office hours; assisted with assignment and exam design.
- **TODO Program** — Mentor (YEAR–YEAR): mentored undergraduate researchers; advised on grad-school applications.

Professional Activities

- TODO: e.g. referee for a journal, review panel member, committee service.

Honors and Awards

- **YEAR** — TODO Fellowship / Award

Talks

- *TODO Conference / Seminar*, Location (Month Year)

Posters

- *TODO Conference*, Location (Month Year)

Workshops

- *TODO Workshop / Summer School*, Location (Month Year)

First-Author Publications

The Age–Metallicity–Specific Orbital Energy Relation for the Milky Way’s Globular Cluster System Confirms the Importance of Accretion for Its Formation

Jan 2021

Woody, R., Schlaufman, K. C.

ui.adsabs.harvard.edu/abs/2021AJ....162...42W/abstract (AJ, 162, 42)

The Rapid Formation of the Metal-poor Milky Way

Jan 2025

Woody, R., et al.

ui.adsabs.harvard.edu/abs/2025ApJ...978..152W (ApJ, 978, 152)

Classical Cases of Non-Solar Mixing Length in Low Mass Stars

Woody, R., et al.

(in preparation)

Co-Author Publications
